EXPERIENCE

Barodaweb | May 2023 - January 2024

- **Gathered project requirements** from 5+ clients and successfully delivered and maintained projects on time.
- **Worked as part of a dynamic team** of SEO executives, front-end developers and web designer.
- Wrote a JavaScript script to migrate data from a SQL database to MongoDB used for **converting 3 ASP.NET projects in to MERN** stack, resulting in a 20% reduction in data processing time.
- Developed and deployed **RESTful APIs** for CMS development and customization of static websites
- Key projects:
 - **pushtishangar.com** : Contributed to an intricate e-commerce website involving complex features such as cart functionalities, diverse offers, and comprehensive inventory management.
 - **simmonsrana.com** : Architected and implemented the migration from .NET MVC to the MERN stack. Undertook challenging tasks like database migration from SQL to MongoDB, and seamlessly integrated payment gateway solutions

Amitaujas LLP | April 2022 - Octpberr 2022

- Collaborated with a team of developers and designers.
- contributing to the development, testing, and deployment of APIs for the company's product HR Management System (HRMP)
- Gained hands-on experience in Node.js and SQL programming, including the development of RESTful APIs and the optimization of database performance.
- Participated in code reviews and knowledge-sharing sessions, fostering a collaborative environment and continuously improving coding practices.
- **Developed a task management system for a company**, gaining significant experience in project management, team collaboration, and software development.
